Crane Operator

Crane Operators in the forest industry operate mechanical boom and cable or tower and cable equipment to lift and move materials, machines, or products in many directions where maneuverability is restricted, and accuracy is critical. Some operators may use RF scans to enter PO numbers for various products. Being a crane operator is a fast-paced, physically demanding job that requires attention to detail and good hand-eye coordination.

Other job titles include: Woodyard Crane Opertor, Winchman, Heavy Equipment Operator
