

Forest Products Processing Manager

Forest products processing managers oversee teams of employees who operate pulp and paper mills, sawmills, planing mills, plywood and particleboard mills, and similar production mills. To become a mill supervisor, you will need technical training covering some or all of the mill's complex processes. Learning on the job and building your seniority in the mill are also essential. As you gain experience, you may also mentor and train other staff.

Other job titles include: Area Plant Manager, Line Manager, General Production Manager, Production Control Manager.

Education & Training

Most of these occupations require a four-year bachelor's degree, but some do not.
