

Ecologist

As an ecologist, your role is to apply the fundamental principles and processes of natural ecosystems to develop models for efficient industrial systems. This requires utilizing knowledge from both the physical and social sciences to maximize the effective use of natural resources in the production and use of goods and services. By doing so, you can help create a sustainable future for our planet and its inhabitants.

Other job titles include: Industrial Ecologist, Environmental Consultant, EPA Counselor.

Education & Training

Most of these occupations require graduate school. For example, they may require a master's degree, and some require a Ph.D., M.D., or J.D.
